U.S. DEPARTMENT OF ENERGY
Nuclear Energy

Infrastructure Management Program

NSUF Nuclear Science User Facilities

1. Gather Data on Nuclear Energy R&D Capabilities
2. Estimate Near, Mid and Long-term R&D Directions
3. Use these to perform gap analyses for Nuclear Energy R&D.
4. Assist funding decisions and incorporate the results into the NEID.

User Access Levels

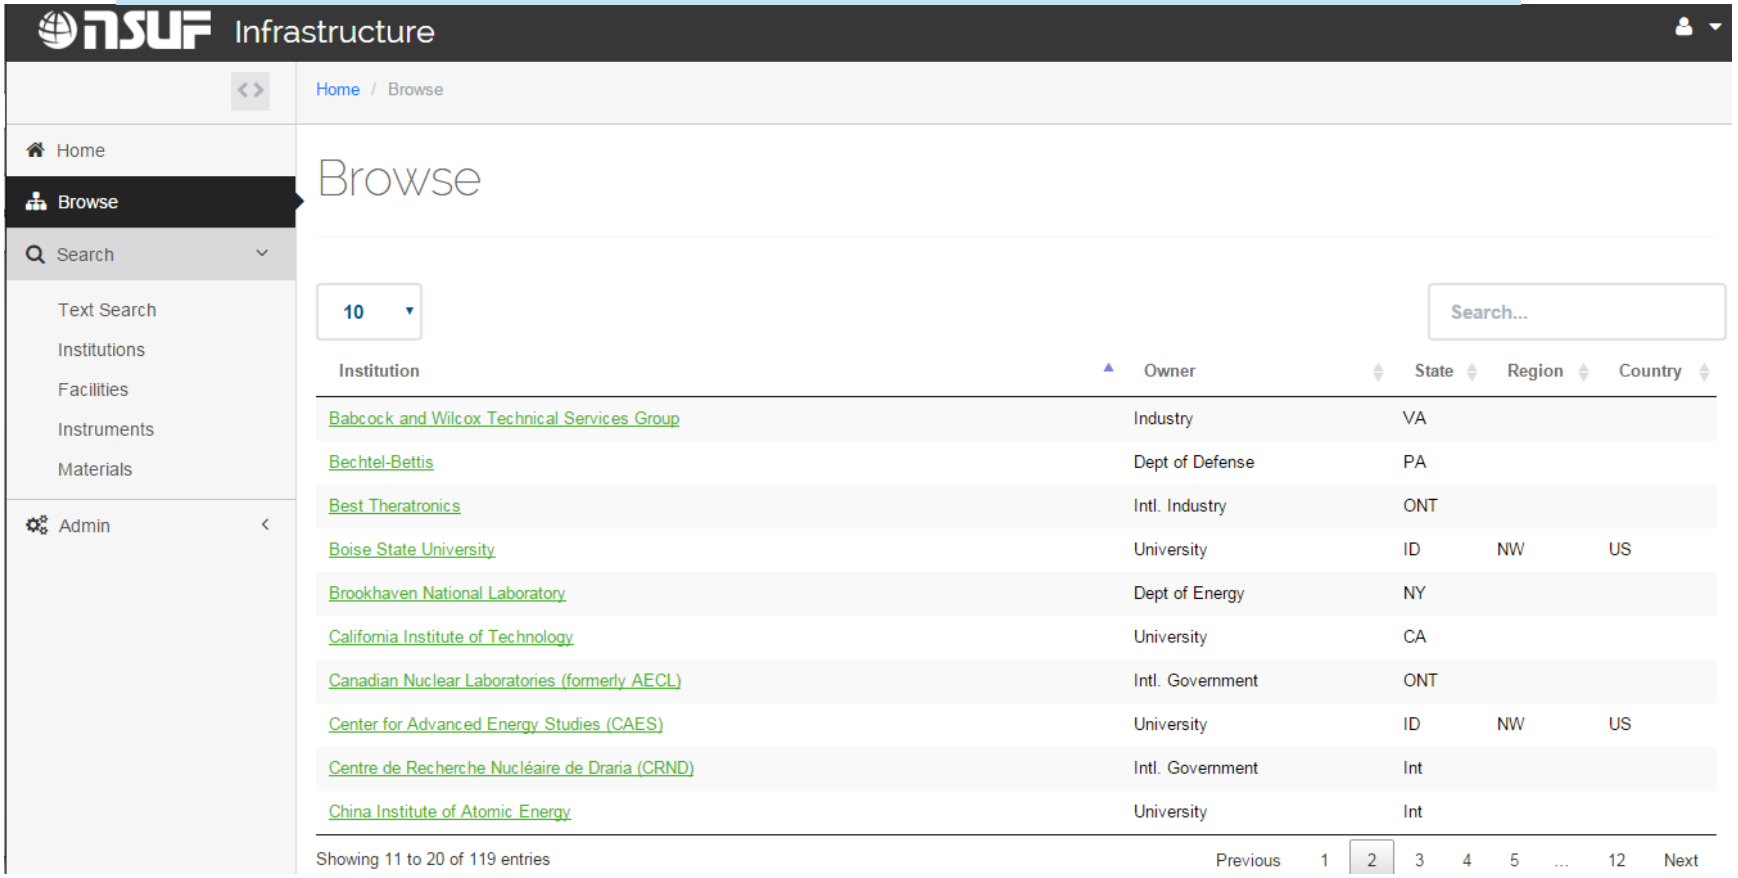
NSUF Nuclear Science User Facilities

Implemented User Access Levels and Facility Owner "Write" Access.

User Type	Level	Example	Data Access/Read	Write (add or edit)	Delete Record	Add Users and Change Levels
Administrator	5	BJH, IM, NSUF	ALL	YES	YES	YES
NSUF Partner (Laboratory)	4	ORNL, PNNL	ALL	YES	NO	NO
NSUF Partner (Univ./Industry)	3	MIT, WEC	SOME	YES	NO	NO
Internal User	2	INL, DOE, etc.	ALL	NO	NO	NO
External User	1	NE applicant	SOME	NO	NO	NO
Outsider	0	Prior to Authorization	NONE	NO	NO	NO

New NEID Format

- Redesign of the NEID to match the new NSUF web page.
- Includes the ability to access the Fuels and Materials Library.



U.S. DEPARTMENT OF ENERGY
Nuclear Energy

What can we build from NSUF Data?

NSUF Nuclear Science User Facilities

1. **We can connect facilities and instruments as parts of a process to accomplish a research method or process, such as:**
   - Microstructural characterization of irradiated fuel.
   - Irradiation experiment (through design, fabrication, irradiation, etc.)
2. **We can include fuels and materials:**
   - Fuels and Materials Library
   - Link to facilities utilized
   - Link to researchers
3. **We can connect research:**
   - Subject matter
   - Facilities utilized
   - PIs & collaborators
4. **We can include expertise:**
   - Support for **GAIN**

Nuclear Energy

Additional Usability Improvements

NSUF Nuclear Science User Facilities

In order to better support the users of the NSUF access programs:

- Develop tools (JAVA or C#) to help users and NSUF Tech Leads:

1. **Estimate sample activity following irradiation**
   - Estimate time to be able to ship samples
   - Determine facilities that can accept materials
   - Estimate dose from characterization procedures
   - Also for materials in the FMSL

2. **Irradiation resource selection**
   - Neutron flux and spectrum for NSUF reactors
     - Most efficient allocation of resources
   - Convert Neutron Fluence to DPA
     - Materials scientists request dpa
     - Reactor engineers think in terms of fluence
     - Compound materials can be difficult

GAIN

NSUF Nuclear Science User Facilities

Small Business Vouchers Pilot

Graph (Social) Network Dependency Models

Supports:

- process design for NEID
- capacity planning for FOA

Gap Analysis Plan

NSUF Nuclear Science User Facilities

1. **Capability analysis**, based on:
   - **Nuclear Energy Infrastructure Database**
   - A study of recent **NEUP infrastructure applications**
   - **NEET-NSUF work-scope access applications**
   - **R&D capabilities survey (RFI: DE-SOL-0008318)**

Applications/Submissions		
	FY 15	FY 16
RRI	13	13
GSI-1	25	35
GSI-2	12	5
NSUF	31	67
Infra-RFI	26/34	
WS-RFI	124/238	

2. **R&D Directions analysis**, based on:
   - **NE-4 R&D work-scope survey (RFI: DE-SOL-0008246)**
   - **A study of recent NEUP R&D applications**
   - **Programmatic input:** NE R&D Roadmap (2010), Facilities for the Future of NE R&D (2009), Required Assets for an Applied R&D Program (2009)

U.S. DEPARTMENT OF ENERGY
Nuclear Energy

Gap Analysis Structure

NSUF Nuclear Science User Facilities

1. **Analyzed capabilities include both facilities and capital equipment**
   - Mission-mapped facilities from program documents.
   - Geographical distribution and availability of access.
   - Age and availability (utilization and reliability).
   - Infrastructure requests (NEUP/NEET and RFI)

2. **What areas of NE R&D have researchers expressed interest in pursuing?**
   - What areas are currently being pursued? (NEUP R&D applications)
   - What areas are on the horizon? (work-scope RFI)
   - What R&D capabilities will be required to support the researchers? (NEID)

3. **Support for the NE-4 Infrastructure FOA writing and reviewing process**
   - Review support provided for the FY 2015 FOA
   - Drafting and Review support provided for the FY 2016 FOA
   - Drafting, review and gap analysis support to be provided for FY 2017

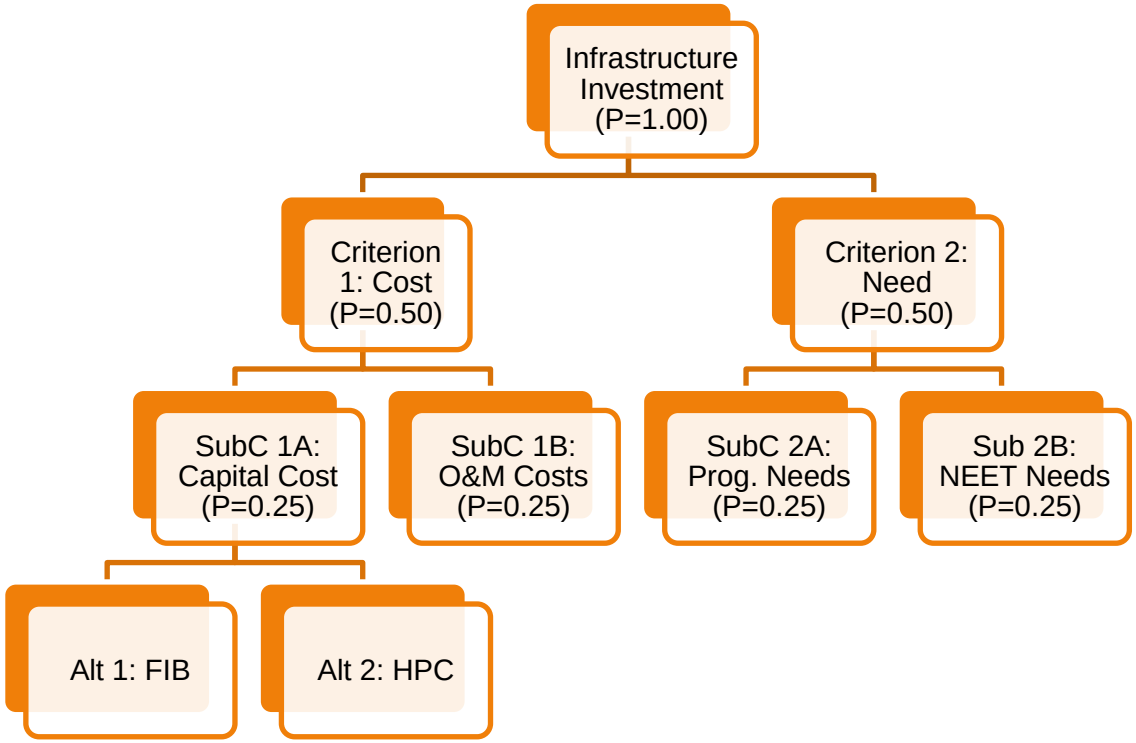
Proposed Funding Recommendation Methodology

Nuclear Science User Facilities

- An **Analytical Hierarchy Process** (AHP) is a transparent and rigorous process developed in the 1970's to aid in decision-making for groups.
- Uses a similar process to the 2015 Innovation Workshops
- The process begins with a list of alternatives and a list of constraining criteria.
- The alternatives will be judged against one another against each criteria.



U.S. DEPARTMENT OF ENERGY
Nuclear Energy

Analytical Hierarchy Process Flow

NSUF Nuclear Science User Facilities

1. First, rank the **criteria** using the AHP
   - NEID DRP can perform this task
   - Cost, mission need, cross-cutting applicability, etc.
   - This will result in a ranking of the criteria from most to least important (they will have numeric weights assigned).

2. Second, rank the **alternatives** 2-by-2 against each criterion
   - Provide summary data on alternative
   - NEAC-FSC can perform this task.

3. Finally, **weight** the alternatives rankings by the criteria importances from step 1.

4. The **result** is a ranked (and scored) list of the investment alternatives.

U.S. DEPARTMENT OF ENERGY
Nuclear Energy

Alternative's Data Summary Example

NSUF Nuclear Science User Facilities

Applicant Institution	Idaho National Laboratory	**Title**	HPC Capabilities at NSUF
Applicant	Denise Stephens	**Capital Intensity**	Minor Refit
Applicant Type	National Laboratory	**Capital Cost (MM$)**	10
Capability Location	@ INL	**Construction Time (years)**	5 (incremental spending each year to add HPC capacity)
Tracking ID	RFI-IN-9792	**O&M Costs (MM$/yr)**	2
Summary	Build upon existing HPC infrastructure at INL and expand NSUF access to HPC facilities and resources.		
Existing Capabilities	Many similar facilities, including DOE-SC, but these are local and not NE-focused.		
Expected Utilization	Expected utilization is high, based on support for V&V for NEAMS and CASL as well as experimental design for ATR and TREAT and other simulation needs.		
NE Priority	Modeling and simulation are a growing area. The capability will support the TREAT restart, as well as CASL and NEAMS programs.		
Functional Areas	HPC		
NE Missions	LWRS	ARC	RD&D
R&D Areas	NF	RSK	ST

Pending Deliverables

Ion Beam Investment Options Workshop

- Major issue arising from FY 2015 Infrastructure RFI
- Workshop scheduled for March 22-24, 2016 at INL
- Summary report due June 30, 2016.
- Invited major facility representatives, industry and regulators.
- First NSUF application of ThinkTank for infrastructure decision-making.

Updated Gap Analysis Report

- Due June 30, 2016 (planning to shift to 9.29.2016).
- Based upon:
  - FY2016 CINR and Infrastructure FOA data.
  - Analytical Hierarchy Process results
  - Updated infrastructure RFI (December 2015 re-release)
  - Continued effort to expand the NEID and add detailed data
    - Emphasis on excess capacity in the community

Nuclear Energy

Database Functionality

NSUF Nuclear Science User Facilities

The NE Infrastructure DB has/will have the ability to:

1. **Search (query) by:**
   - Keyword or Capability
   - Facility type
   - Instrument type
   - Geography/Institution
   - Group of terms

2. **Generate custom reports based on these queries.**

3. **Feed directly into a visualization system for custom maps**
   - Future implementation of GIS technology
   - Graph network system with inputs, outputs and dependencies

U.S. DEPARTMENT OF ENERGY
Nuclear Energy

NEID Database Review Panel

NSUF Nuclear Science User Facilities

Comprised of five members representing:

- University research (Peter Hosemann – Berkeley)
- University reactors (Lin-wen Hu - MIT)
- Nuclear Industry (Peng Xu – WEC)
- National Laboratories (Dave Senor – PNNL)
- DOE Programs (Jason Tokey – NE-31)

1. **Determine Database Sufficiency**
   - Appropriate and complete
   - Additional sources of information
2. **Validate Database**
   - Common terminology in entries
   - Error checking of data entries
3. **Investigate Infrastructure Needs Drivers** (gap analysis)
   - R&D infrastructure requirements
   - Missing or over-utilized capabilities
